

CONTRIBUTORS

Jonas I. Addae, M.B.B.S., Ph.D. Chair, Department of Physiology, University of the West Indies, St. Augustine, Trinidad and Tobago, West Indies

Andrew M. Allen Howard Florey Institute of Experimental Physiology and Medicine, University of Melbourne, Parkville, Victoria, Australia

Phillip W. Archer, Ph.D. Department of Physiology and Biophysics, College of Medicine, Howard University, Washington, D.C.

David B. Averill, Ph.D. Assistant Professor, Hypertension Center and Departments of Physiology and Pharmacology, Bowman Gray School of Medicine of Wake Forest University, Winston-Salem, North Carolina

Barbara Badio, Ph.D. I.R.T.A. Fellow, Laboratory of Bioorganic Chemistry, National Institutes of Health, Bethesda, Maryland

David G. Bernard, Ph.D.* Postdoctoral Fellow, Department of Physiology and Biophysics, College of Medicine, Howard University, Washington, D.C.

**Present affiliation:* Dartmouth Medical School, Lebanon, New Hampshire.

Gerald E. Bisgard Department of Comparative Biosciences, University of Wisconsin, Madison, Wisconsin

John M. Bissonette, M.D. Professor of Obstetrics and Gynecology and of Cell Biology and Anatomy, Department of Obstetrics and Gynecology, Oregon Health Sciences University, Portland, Oregon

Donald C. Bolser, Ph.D. Associate Principal Scientist, Department of Allergy, Schering-Plough Research Institute, Kenilworth, New Jersey

P. S. Bolton Division of Human Physiology, Department of Medicine, University of Newcastle, Callaghan, New South Wales, Australia

Ann C. Bonham, Ph.D. Assistant Professor, Division of Cardiovascular Medicine, Departments of Internal Medicine and Pharmacology, University of California at Davis, Davis, California

E. Boudinot Institut Alfred Fessard, Biologie Fonctionnelle du Neurone, CNRS, Gif-sur-Yvette, France

W. Richard Campbell, Ph.D. Assistant Professor, Department of Biology, Morris Brown College, Atlanta, Georgia

Ruy R. Campos, Jr., Ph.D. Assistant Professor, Department of Physiology, Escola Paulista de Medicina, São Paulo, Brazil

Richard W. Chapman Schering-Plough Research Institute, Kenilworth, New Jersey

Clivel George Charlton, Ph.D. Associate Professor of Pharmacology, Division of Basic Pharmaceutical Sciences, College of Pharmacy and Pharmaceutical Sciences, Florida A & M University, Tallahassee, Florida

Neil S. Cherniack, M.D. Dean and Professor of Medicine, School of Medicine, Case Western Reserve University, Cleveland, Ohio

Deepak K. Chugh, M.B.B.S., M.D. Postdoctoral Fellow, Department of Physiology, University of Pennsylvania School of Medicine, Philadelphia, Pennsylvania

John Ciriello, Ph.D. Professor, Department of Physiology, Health Sciences Centre, University of Western Ontario, London, Ontario, Canada

E. Lee Coates, Ph.D. Postdoctoral Fellow, Department of Physiology, Dartmouth Medical School, Lebanon, New Hampshire

Morton I. Cohen, Ph.D. Professor of Physiology and Neuroscience, Department of Physiology and Biophysics, Albert Einstein College of Medicine, Bronx, New York

Sharon K. Coles, Ph.D. Postdoctoral Research Fellow, Division of Pulmonary and Critical Care Medicine, Departments of Medicine, Neuroscience, and Physiology and Biophysics, School of Medicine, Case Western Reserve University, Cleveland, Ohio

Laura A. Collins Research Assistant, Division of Endocrinology/Hypertension, Department of Medicine, School of Medicine, Case Western Reserve University, Cleveland, Ohio

S. L. Cravo, Ph.D. Associate Professor, Department of Physiology, Escola Paulista de Medicina, São Paulo, Brazil

Jay B. Dean, Ph.D. Assistant Professor, Department of Physiology and Biophysics, College of Science and Mathematics, Wright State University School of Medicine, Dayton, Ohio

Frances C. DeGennaro Schering-Plough Research Institute, Kenilworth, New Jersey

Ozra Dehkordi, Ph.D. Assistant Professor, Division of Neurosurgery, Department of Surgery, Howard University Hospital, Washington, D.C.

Michael S. Dekin, Ph.D. Assistant Professor, Division of Pulmonary and Critical Care Medicine, Department of Medicine, University of Medicine and Dentistry of New Jersey-Robert Wood Johnson Medical School, New Brunswick, New Jersey

M. Denavit-Saubié, Ph.D. Director, Institut Alfred Fessard, Biologie Fonctionnelle du Neurone, CNRS, Gif-sur-Yvette, France

Gary C. Dennis, M.D. Associate Professor and Chief of Neurosurgery, Division of Neurosurgery, Department of Surgery, Howard University Hospital, Washington, D.C.

Thomas E. Dick, Ph.D. Associate Professor, Division of Pulmonary and Critical Care Medicine, Department of Medicine, School of Medicine, Case Western Reserve University, Cleveland, Ohio

Robert M. Douglas Predoctoral Fellow, Department of Physiology and Biophysics, College of Medicine, Howard University, Washington, D.C.

Ismail A. Dreshaj, M.D., Ph.D. Department of Pediatrics, School of Medicine, Case Western Reserve University, Cleveland, Ohio

Paul Ernsberger, Ph.D. Assistant Professor, Division of Endocrinology/Hypertension, Departments of Medicine, Pharmacology, and Neuroscience, School of Medicine, Case Western Reserve University, Cleveland, Ohio

Levent Ertugrul, Ph.D. Assistant Professor, Department of Physiology, Faculty of Medicine, University of Istanbul, Istanbul, Turkey

Jay P. Farber, Ph.D. Professor, Department of Physiology, University of Oklahoma Health Sciences Center, Oklahoma City, Oklahoma

Jack L. Feldman, Ph.D. Professor of Neurosciences, Department of Physiological Science, University of California at Los Angeles, Los Angeles, California

J. J. Filiano, M.D. Department of Neurology, Children's Hospital, and Harvard Medical School, Boston, Massachusetts

Eric A. Floyd Research Assistant, Department of Physiology, Meharry Medical College, Nashville, Tennessee

Gregory D. Funk, Ph.D. Research Associate, Department of Physiological Science, University of California at Los Angeles, Los Angeles, California

Owen Gardner Research Assistant, Department of Biological Sciences, Oakwood College, Huntsville, Alabama

Philip J. Gatti, Ph.D. Associate Professor, Department of Pharmacology, College of Medicine, Howard University, Washington, D.C.

Sergio B. Giancola, B.Sc., M.Sc. Department of Physiology, Health Sciences Centre, University of Western Ontario, London, Ontario, Canada

Ashton Gibbons, Ph.D. Professor, Department of Biological Sciences, Oakwood College, Huntsville, Alabama

T. Goto Department of Orthopaedic Surgery, Omiya Red Cross Hospital, Yono City, Saitama, Japan

David Gozal, M.D. Associate Professor of Pediatrics and Physiology, Section of Pediatric Pulmonology, Children's Hospital of Tulane, Tulane University School of Medicine, New Orleans, Louisiana

Antonio R. Granata, M.D., Ph.D. Associate Professor, Department of Pharmacology, University of Tennessee, Memphis, Memphis, Tennessee

Marilyn E. Graves Research Assistant, Division of Endocrinology/Hypertension, Department of Medicine, School of Medicine, Case Western Reserve University, Cleveland, Ohio

Patricia A. Grimes, Ph.D. Associate Professor, Department of Ophthalmology, and Scheie Eye Institute, University of Pennsylvania School of Medicine, Philadelphia, Pennsylvania

P. G. Guertzenstein, M.D., Ph.D.† Department of Physiology, Escola Paulista de Medicina, São Paulo, Brazil

Patrice G. Guyenet, Ph.D. Professor, Department of Pharmacology, University of Virginia Health Sciences Center, Charlottesville, Virginia

Brennie E. Hackley, Jr., Ph.D. Adjunct Professor and Chief Scientist, Department of the Army, United States Army Medical Research Institute of Chemical Defense, Aberdeen Proving Ground, Maryland

Gabriel G. Haddad, M.D. Professor of Pediatrics and Cellular and Molecular Physiology, and Director, Section of Respiratory Medicine, Department of Pediatrics, Yale University School of Medicine, New Haven, Connecticut

Ronald M. Harper, Ph.D. Professor of Anatomy and Cell Biology, Brain Research Institute, University of California at Los Angeles School of Medicine, Los Angeles, California

Musa A. Haxhiu, M.D., Ph.D. Professor of Medicine (Pulmonary) and Neuroscience, School of Medicine, Case Western Reserve University, Cleveland, Ohio

Michael S. Hedrick, Ph.D. Postdoctoral Fellow, Department of Comparative Biosciences, University of Wisconsin, Madison, Wisconsin

John A. Hey Schering-Plough Research Institute, Kenilworth, New Jersey

Timothy W. Higenbottam, M.D., F.R.C.P. Consultant Physician and Director, Department of Respiratory Physiology, Papworth Hospital, Cambridge, England

†Deceased

Yoshiyuki Honda, M.D. Professor of Physiology Emeritus, Departments of Physiology and Chest Medicine, Chiba University School of Medicine, Chiba, Japan

Donald B. Jennings, M.D., C.M., Ph.D. Professor, Department of Physiology, Queen's University, Kingston, Ontario, Canada

Jozef S. Jodkowski, M.D., Ph.D. Visiting Professor, Department of Physiology, Institute of Physiological Sciences, Medical Academy of Warsaw, Warsaw, Poland

Elmond J. Johnson Research Assistant, Department of Biological Sciences, Oakwood College, Huntsville, Alabama

Stephen M. Johnson, M.D., Ph.D. Research Associate, Department of Physiological Science, University of California at Los Angeles, Los Angeles, California

Shereé M. Johnson Research Assistant, Department of Physiology and Biophysics, College of Medicine, Howard University, Washington, D.C.

Yuan-Hsu Kang, Ph.D. Senior Investigator, Pathobiology Division, Naval Medical Research Institute, Bethesda, Maryland

R. Kanjhan Department of Physiology, University of Auckland School of Medicine, Auckland, New Zealand

Masao Katayama, M.D. Visiting Postdoctoral Fellow, Department of Physiology, University of Pennsylvania School of Medicine, Philadelphia, Pennsylvania

F. Kato, Ph.D. Institut Alfred Fessard, Biologie Fonctionnelle du Neurone, CNRS, Gif-sur-Yvette, France

I. A. Kerman Department of Physiology and Biophysics, New York University, New York, New York

Hiroshi Kimura, M.D. Assistant Professor, Department of Chest Medicine, Chiba University School of Medicine, Chiba, Japan

Hannah C. Kinney, M.D. Associate Professor of Neuropathology, Department of Pathology, Harvard Medical School, and Children's Hospital, Boston, Massachusetts

Heidrun F. Kiwull-Schöne, M.D., Ph.D. Professor, Department of Physiology, Ruhr-University Bochum, Bochum, Germany

B. Kruszewska Department of Physiology, University of Auckland School of Medicine, Auckland, New Zealand

Ganesh K. Kumar, Ph.D. Assistant Professor, Department of Biochemistry, School of Medicine, Case Western Reserve University, Cleveland, Ohio

Sukhamay Lahiri, D.Phil. Professor, Department of Physiology, University of Pennsylvania School of Medicine, Philadelphia, Pennsylvania

Aihua Li Department of Physiology, Dartmouth Medical School, Lebanon, New Hampshire

Janusz Lipski, M.D., Ph.D. Professor, Department of Physiology, University of Auckland School of Medicine, Auckland, New Zealand

Arthur D. Loewy, Ph.D. Professor, Department of Anatomy and Neurobiology, Washington University School of Medicine, St. Louis, Missouri

O. U. Lopes, M.D., Ph.D. Full Professor, Department of Physiology, Escola Paulista de Medicina, São Paulo, Brazil

Kevin R. Lynch Department of Biochemistry, University of Virginia Health Sciences Center, Charlottesville, Virginia

Nadine Lyseight Research Assistant, Department of Biological Sciences, Oakwood College, Huntsville, Alabama

Janea Mack Research Assistant, Department of Pharmacology, Meharry Medical College, Nashville, Tennessee

Andrew A. Martin, M.D. Assistant Professor, Division of Pulmonary and Critical Care Medicine, Department of Medicine, University of Medicine and Dentistry of New Jersey-Robert Wood Johnson Medical School, New Brunswick, New Jersey

Richard J. Martin, M.D. Professor, Department of Pediatrics, School of Medicine, Case Western Reserve University, and Rainbow Babies and Childrens Hospital, Cleveland, Ohio

James C. McKenzie, Ph.D. Associate Professor, Department of Anatomy and Howard University Cancer Center, College of Medicine, Howard University, Washington, D.C.

Alecia McLean Research Assistant, Department of Biological Sciences, Oakwood College, Huntsville, Alabama

G. Norris Melville, M.D., Ph.D. Campus Dean and Professor of Physiology, Faculty of Medical Sciences, University of the West Indies, St. Augustine, Trinidad and Tobago, West Indies

Alan D. Miller, Ph.D. Associate Professor, Laboratory of Neurophysiology, Rockefeller University, New York, New York

Martha J. Miller, M.D., Ph.D. Departments of Pediatrics and Medicine, School of Medicine, Case Western Reserve University, and Rainbow Babies and Childrens Hospital, Cleveland, Ohio

Richard M. Millis, Ph.D. Assistant Professor, Department of Physiology and Biophysics, and Instructor, Department of Neurology, College of Medicine, Howard University, Washington, D.C.

Jayoti Mitra, Ph.D. School of Medicine, Case Western Reserve University, Cleveland, Ohio

CONTENTS

<i>Introduction</i>	Claude Lenfant	iii
<i>Foreword</i>	Neil S. Cherniak	v
<i>Preface</i>		vii
<i>Contributors</i>		xi

Part One HISTORICAL PERSPECTIVES

1. The "Reaction Theory" of Hans Winterstein (1879-1963) in the Light of Today's Research on the Ventrolateral Medulla <i>Heidrun F. Kiwull-Schöne</i>	1
I. Introduction	1
II. Curriculum Vitae	4
III. Winterstein's Scientific Life Work	9
IV. Posthumous Appreciation: The Symposium on Cerebrospinal Fluid, New York, 1964	16
V. On the Way to Today's Research on the Ventrolateral Medulla	19

VI. Today's Research on the Ventrolateral Medulla	26
VII. Open Questions and Future Perspectives	30
References	33
2. Control and Rhythm	41
<i>Marianne E. Schläfke</i>	
I. Hans H. Loeschcke	41
II. Hans-Peter Koepchen	49
References	63
Part Two INTEGRATIVE ASPECTS OF VENTRAL BRAINSTEM FUNCTION IN RESPIRATORY AND VASOMOTOR CONTROL	
RESPIRATORY REGULATION	
3. Functional Assessment of the Ventral Medullary Surface by Optical Imaging	67
<i>David Gozal, David M. Rector, and Ronald M. Harper</i>	
I. Introduction	67
II. Assessment of Neural Activity by Scattered Light	69
III. Ventral Medullary Surface Respiratory-Induced Optical Activity	74
IV. Summary and Conclusions	76
References	77
4. Identification of Brainstem H⁺ Ion-Chemosensitive Regions by c-fos Immunocytochemistry	81
<i>Robert M. Douglas, C. Ovid Trough, Yi Pan, James C. McKenzie, Winston N. Smith, G. Norris Melville, and Nicole E. Mourillon</i>	
I. Introduction	81
II. Expression of c-fos Protein in the Brainstem of the Rat in Response to the Topical Application of Kainic Acid (1%)	83
III. Expression of c-fos Protein in the Brainstem of the Rat in Response to the Topical Application of Acidic Mock Cerebrospinal Fluid	85
IV. Summary	89
References	90
5. Central and Peripheral Sites of Action of Antitussive Drugs in the Cat	95
<i>Donald C. Bolser, Frances C. DeGennaro, Richard W. Chapman, and John A. Hey</i>	

I. Introduction	95
II. Methods	96
III. Results	97
IV. Discussion	100
References	101
6. The Role of the Ventral Medulla in Hypoxic Respiratory Depression and Sympathetic Excitation	103
<i>Neil S. Cherniack, Paul Ernsberger, Jayoti Mitra, and Musa A. Haxhiu</i>	
I. Introduction	103
II. Hypoxic Depression of Respiration	104
III. Regional Differences in the Brain in Sensitivity to Hypoxic Depression	105
IV. Effects of Hypoxia on the Vasomotor System	106
V. Effects of Hypoxia on the Respiratory Modulation of Sympathetic Activity	108
VI. In Vitro Studies on the Electrophysiological Effects of O ₂ Deprivation in Ventrolateral Medullary Neurons	120
VII. Neurotransmitters Involved in Hypoxia-Induced Respiratory Depression and Sympathetic Excitation	121
VIII. Conclusion	124
References	124
7. Central Chemoreceptor Location and the Ventrolateral Medulla	131
<i>Eugene E. Nattie, Aihua Li, and E. Lee Coates</i>	
I. Introduction	131
II. Central Chemoreceptors	133
III. The Intermediate Area	138
IV. Conclusions	145
References	146
B. Hypoxic Ventilatory Depression and Ventral Medullary Acidosis	151
<i>John W. Severinghaus</i>	
References	154

AUTONOMIC REGULATION	
9. The Ventral Medullary Network and Airway Control	157
<i>Musa A. Haxhiu, Arthur D. Loewy, and Neil S. Cherniack</i>	
I. Introduction	157
II. The Role of Ventrolateral Medulla in Regulation of Nasal Patency	158
III. A Role for the Ventral Surface of the Medulla (VMS) in Regulation of Pharyngeal Patency	160
IV. The Ventral Medullary Network and Control of Bronchial Caliber	163
V. Influences of the VMS on Airway Responses to Stimulation of Peripheral Chemoreceptors	165
VI. Influence of the VMS in Tracheal Gland Secretion	168
VII. Transneuronal Labeling Studies of Ventral Medullary Circuitry Involved in Regulation of Parasympathetic Outflow to the Airways	168
VIII. Ventral Medullary Network and Respiratory-Related Disorders	174
References	176
10. The Role of the Ventral Brainstem in Vestibulosympathetic and Vestibulorespiratory Reflexes	181
<i>B. J. Yates, P. S. Bolton, T. Goto, I. A. Kerman, and Alan D. Miller</i>	
I. Introduction	181
II. Vestibular Influences on Sympathetic and Respiratory Outflow	182
III. The Role of the Ventral Brainstem in Producing Vestibulo-Sympathetic Reflexes	183
IV. The Roles of the Ventral Brainstem in Producing Vestibulorespiratory Reflexes	188
V. Summary	189
References	190
11. The Role of the Caudal Ventrolateral Medulla in the Reflex Bronchodilation Arising from the Hindlimb	193
<i>Irene C. Solomon</i>	
I. Introduction	193
II. Reflex Responses Arising from Hindlimb Afferents	193

III. The Dorsal Horn	194
IV. The Ventrolateral Medulla	195
V. Hindlimb Afferents and the Ventrolateral Medulla	196
VI. Summary	200
References	200
12. Central Effects and Interactions of the Renin-Angiotensin System and Vasopressin on Ventilation and PaCO₂	203
<i>Donald B. Jennings, Julia K. L. Walker, and Patricia J. Ohtake</i>	
I. Introduction	204
II. Homeostasis of Body Fluids and the Circumventricular Organs	204
III. Interactions Between CVO and Osmotic and Hormonal Neuromodulators	206
IV. ANG II Within the Brain and CVO	206
V. The Brain Renin-Angiotensin System	207
VI. Inhibition of Renal and Brain Renin-Angiotensin Systems by AVP	208
VII. Respiratory Effects of ANG II and AVP and Interactions with Arterial Baroreceptors	208
VIII. Regulation of Ventilation and PaCO ₂ During Changes in Osmolality	211
IX. Stimulation of Ventilation During Endogenous Increases in ANG II	211
X. Potential Importance of Up- and Downregulation of ANG II Receptors for Respiratory Control	216
XI. Summary of Our Current Hypothesis for Respiratory Control by Hormones	218
XII. How Is Hormonal and Osmolality Control of Respiration Coordinated with Chemical Control During Respiratory Adaptations?	219
References	220
13. Central and Peripheral Respiratory Control Mechanisms After Lung Denervation in Humans	225
<i>Babatunde A. Otulana and Timothy W. Higenbottam</i>	
I. Introduction	225
II. Hypercapnic Ventilatory Response	227
III. Response to Exercise	228
IV. Pulmonary Afferents and Control of Ventilation	231

V. Conclusion	233
References	234
14. Modulation of Pedunculopontine Tegmental Nucleus and Alterations in Glutamate-Evoked Discharge Rate of Nucleus Ambiguus Cholinergic Neurons in Rats	237
<i>Hubert K. Rucker, Eric A. Floyd, W. Eric Thomas, and Eric L. Moore</i>	
I. Introduction	237
II. The Rat Pedunculopontine Tegmental Nucleus	239
III. Nucleus Ambiguus	242
IV. Discussion	245
References	248
15. Overview of Integrative Aspects of Ventral Brainstem Function: The Intermediate Area and the Ventral Medulla	253
<i>Eugene E. Nattie</i>	
I. Introduction	253
II. The Intermediate Area	254
III. Possible Neuronal Substrates of the IMA	254
IV. Central Chemoreceptors; CO ₂	256
V. Central Chemoreception; O ₂	256
VI. Airways	257
VII. Breathing	258
VIII. Blood Pressure	258
IX. Nociception	259
X. Vestibular System	260
XI. Why Are So Many Functions Attributed to Neurons So Close to Each Other and to the VLM Surface? What Is the Functional Significance of These Rostral VLM Neurons?	260
References	262
Part Three NEUROREGULATORS AND NEUROMODULATORS AT THE VENTRAL BRAINSTEM	
BIOGENIC AMINES, IMIDAZOLINE RECEPTORS, STEROID HORMONES	
16. Effect of CMA and MPA, Synthetic Progesterones, on Control of Respiration in Humans	267
<i>Yoshiyuki Honda, Tsuguo Morikawa, Hiroshi Kimura, and Koichiro Tatsumi</i>	

I. Introduction	267
II. Synthetic Progesterone	268
III. Effect of Synthetic Progesterones on Respiratory Activities	268
